

HTML Lists and CSS List Properties

In HTML, there are two main types of lists:

- unordered lists () - the list items are marked with bullets
- ordered lists () - the list items are marked with numbers or letters

The CSS list properties allow you to:

- Set different list item markers for ordered lists
- Set different list item markers for unordered lists
- Set an image as the list item marker
- Add background colors to lists and list items

Different List Item Markers

The `list-style-type` property specifies the type of list item marker.

The following example shows some of the available list item markers:

Example

```
ul.a {  
    list-style-type: circle;  
}  
  
ul.b {  
    list-style-type: square;  
}  
  
ol.c {  
    list-style-type: upper-roman;  
}  
  
ol.d {  
    list-style-type: lower-alpha;  
}
```
