

# Text Decoration

The `text-decoration` property is mostly used to remove underlines from links:

## Example

```
a:link {  
    text-decoration: none;  
}  
  
a:visited {  
    text-decoration: none;  
}  
  
a:hover {  
    text-decoration: underline;  
}  
  
a:active {  
    text-decoration: underline;  
}
```
